In our modern world when things are changing so fast students should be given opportunity to choose what to study by themselves.

I think the educational system should be changed. High school students can study some basic subjects and choose optional ones by themselves. So they would pay attention only to necessary for them subjects and improve their skills more effectively. It is better to have deep knowledge in one or two subjects than try to learn all. Also students would be more involved in studing prosess as they would learn only interesting subjects

On the other hand, too much freedom in education can cause problems. Not all students in their sixteens know what they are interested in. As a result, they can't choose the subjects or do mistakes. Also it's important to be high-educated and open-minded person. It is believed that schools can help with it

In my opinion, it's more important to give students skills that would be useful in their real life or future profession, than try to teach them dozen of useless subjects. Different students cannot have similar skills and tallents. That's why school should help students in realisation ther own tallents. Also, high-educated person is a person who can think, compeare and analyze, but not a person with some randomly ~~in~~ remembered knowledge from different school subjects.

In conclusion, I want to say that the opportunity of choosing subjects is worth thinking by schools and government.

Many people tell that students should be given more choice as to what they study and it's a serious topic to talk about

For the one hand, it's great to give students more choice due to their personality. Everyone thinks different, so they know better what is the best for them. Also, it's great to have many choice to choose a profession you prefer. Usually, it all comes down to money. Everyone choose jobs, which have big payments there. I don't know people who want to be an actor or an artist, but I know lots of students who want to be a programmer or manager only because money. We need to increase earnings of actors and that type of jobs to make sure that people will have many different ways to make their life

For the other hand, It isn't so right to give students more choice. Every country has their achievements to do so they making sure that profession they need will be progressing with lots of clever students

At the conclusion, I definetly think that students should be giver more choice as to what they study. It will increase the medium level of knowledge in countries And at the end we'll have more grown people with wider imagination.

To make different decisions is the most part ~~of~~ in the life of every person. We study, make choices and mistakes. Our life depends on decisons. A lot of scientist ~~Hard~~

I suppose that a person should never make decisions alone. In the my opinion that every person deserves help with the difficult decision. Supporting and care help to make right decision. For example patents can help to their child choose a future profession, because child can make a wrong choice and will be unhappy the rest of his life. Also people often don't know how they should act in different situations, and psychologist can help with troubles.

But some people say that ~~people~~ person must be independent and make decision alone. They say that every people make choices by yourself. They say that no one should intertere with someone else's life.

I don't agree with this opinion because without support a person may fall into depression. Also ~~then~~ when ~~peop~~ person know that ~~sh~~ he have friends and ~~sup~~ their help, he can achieve the goals faster.

In conclusion of my reasoning I want to say that a person should never make decisions alone because support and mental help do our life better and easier.

2.

Nowadays a lot of people think that students should be given a freedom of choice at what they study. This educational problem is really complicated because on the one hand people got the internet and they „know" everything, bet on other hand, you can not use the internet everywhere. In this essay, I will try to figure out the truth of the second given statement. (essay topic)

To begin with, the freedom of choise as to what students study will help them become masters of their profession. For example, pupils will have more free time to practice chosen subjects. Another example is they will not be forced to learn unnecesary subjects.

Nevertheless, there is another point of view. Some people would say that student will only chose easy subjects to study. Firstly, it will harm their knowladge in general and they will know less useful things. Secondly, they are not going to study at all, if they were given a choice.

I can not agree with this opinion because now teenagers think about their future more, than their ancestors. Also people in general become smarter, and students too, so they will study chosen subjects hard.

In conclusion, we can see that their is two opposing opinions about freedom of choise for students. All in all, freedom of choise will gain more positive effects, than if it would not be invented.

There is no denying the fact that we make a lot of important decisions in our life. Some people think that we should soviet with somebody before choosing. Others claim that it would be better to live by our own.

In my opinion, the better way is to make decisions with relying on somebody's advise. Firstly, elder people are more experienced. They can give many useful tips for us. Secondly, when you do not know what to choose someone's help will save your time and nerves. It is important both for youngsters and ~~the~~ middle-aged people. Furthermore, ~~research an ad~~ you can get mental support. In our cruel world it is one of the most important things. 99

On the other side, people think that we should earn our own experience. If we listen to all other's advises we will not live our life. ~~It~~ You would Moreover, be only watcher of events passing through. Moreover, you are the owner of your life and you should not let anyone tell you what to do. 169

I partly disagree with the above statements. To my mind, some kind of experience is too painful and expensive to get. We should not break our leg to find out that it is ~~painful~~ not good for our health. I strongly believe that advises could not influence our life very much if we ~~have make the final chose~~ think by ourselves too.

~~All in all, the problem of making decisions has~~

All in all there are two points of view on the problem of making decisions. Personally, I recommend you to listen what others tell you, but also remember that it is your life and no one's else. 261

A person should never decisions alone.

In our wolrd we must make decisions every day, at work, school or your house. And many of the people can't make decisions alone, they feared about responsibility what they need to accept. It's too easier to make decisions in the group. In the group other people can make desicion without your and responsibility is grouped of all the people. 66

I think the people are scared about responsibility for decision, but how can human had self opinion if he can't make the self decision. ~~Ath~~ Other ~~poy~~ people are thinking for him and do that they need, but not for him. Second thing i mean is human is not human if he can't take responsibility for his decisions, words and the facts. 104

I can express an opposing opinion. First, many of people are dislike self opinion because they mean it's strange and stupid. If you speak with ~~wit~~ this type of people you need to be ready for critik. Seldom you need to make decisions about other people, your friends, kids, or workmade. Some of this people can be aggresive ~~for~~ about you if you make wrong decision. If you scared about errors you can make ~~no~~ decisions in groups ~~and~~ the rick ~~wo~~ will be minimal. 206

last — I think the human is selfmade ~~thing~~, you must do what you want, and don't ~~to~~ always do decisions in groop, you can do it, but read again the 8 second paragraph and think is it what you need? 271

four — I think the self opinion is better because, you can all of the things what you want and grow like a human doing the errors with decisions 234

Hello my friendly friends! I meet you so much and I want tell you something interesting about my life. I live in winter and cold, but brilliant and amazing town. His name is Norilsk, Russia. I meet a lot of kind and lovely friends in England camp. In Russia a lot of green forest, and so tasty food. for example potatoes and carrot. 63

MY
~~MY~~ dear friend.
I am in language camp in England. I am living in an old castle i like alot. I like this place I have a lot of oppo rtu nities to meet intresting people and it's grate. But I have very little free time it's terrible. I haven't got a sleeping time I am tired!. In this place the food isn't very tolsty. I don't know why the food isn't very tolsty? I think the food was very delicious. I was there two months. See you after camp.

Hi George,

This summer I go to a language camp! I'm very happy I go here! There is a lot of interesting things here! First, I'm living in an old castle,. I very like it! Have you imagine in old castle! Second, I have alot of opportunities to meet interesting people here! But, with these huge pluses I have also huge minuses: because lessons I have very little free time! And food here is'nt very delicious. But I don't very worry about this! I like this camp and in the next year I'd like to come here again!

Love,

Nikita
